

Quality feeds and trust
built over 100 years

Duffields are manufacturers of animal feeds from strategically placed mills which are UFAS approved.

The business is owned and controlled by the Duffield family from their Head Office at Saxlingham, near Norwich in Norfolk. The business is focused on producing feeds for the pig, poultry, cattle, sheep, game and specialist feed sectors, sold directly and through the merchant trade.

Our aim is to be the most efficient producer of feeds from manufacture to distribution, sales and management, enabling us to provide a highly competitive offer to our customers. Our uncomplicated management structure allows us to make quick decisions – vital to help our customers in today's fast moving industry and markets.

Starter & Grower Rations

1809 Turkey Starter Crumbs with ACS

- High protein & energy source to maximise growth rates
- Good palatability & quality crumbs for high early intake
- Contains a Coccidiostat & Biomos to support bird health

1244 Turkey Rearer No 1 Plt with Avatec

- Balanced sources of protein & energy to optimise early growth rates
- Good palatability & quality maximising intake
- Contains a Coccidiostat & Herban to support bird health

1255 Turkey Rearer No 2 Plt with Avatec

- A second stage grower to maintain target growth rates, without putting down fat
- Specially formulated for late maturing birds
- Contains a Coccidiostat & Herban to support bird health

Finisher Rations

1256 Turkey Top Weight Finisher No 1 Plt

- To maintain steady growth rates during the finishing period.
- To ensure a good finish & easy plucking
- Contains Herban to support bird health

1257 Turkey Top Weight Finisher No 2 Plt

- A specially designed ration to slow down growth and finish in heavier birds
- Contains Herban to support bird health

1128 Turkey Early Finisher Plt

- A specially designed ration to give a quality finish in lighter or late hatching birds
- Contains Herban to support bird health

Rations are formulated with the aid of nutritional advice from leading nutrition consultants to high specifications.

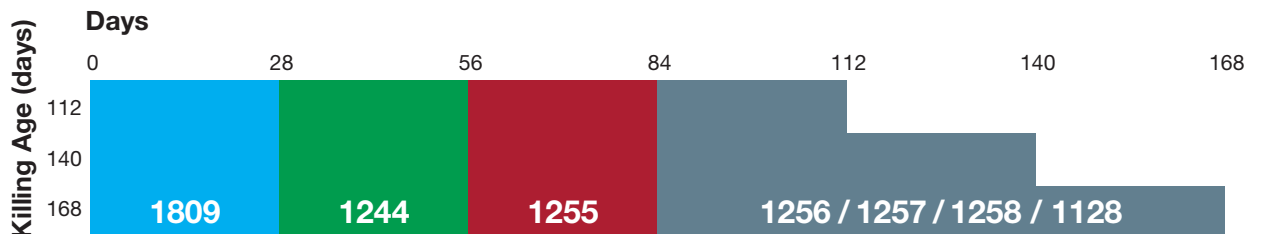

Herban – is a non-medical preparation of essential oils which is a successful preventative solution for blackhead with a unique flavour to support feed consumption in periods of stress.

Predicted Consumptions

Code	Diet	Feeding (Ad Lib)	Approx Consumption (tonnes / 1000 birds)
